CORPORATE GOVERNANCE AT BJÖRN BORG
Corporate governance refers to the rules and structure established to effectively control and manage the operations of a corporation. Ultimately the purpose of corporate governance is to satisfy the demands of shareholders for a return on their investment and the demands of all stakeholders for information regarding the company and its development.

The principles of corporate governance that Björn Borg applies, in addition to the rules pursuant to law or other legislation, follow the Swedish Code of Corporate Governance (“the Code”). The Board of Directors is responsible for monitoring the application of the Code. If a company that is bound by the Code does not comply with the Code in any respect, the company must report this noncompliance, describe the solution it has adopted instead and state the reasons for doing so. During the year Björn Borg had no instances of noncompliance with the Code.

This corporate governance report does not constitute part of the formal annual report.

REMEMBRANCE TO DIRECTORS AND SENIOR EXECUTIVES
Remuneration to the Chairman and other Directors is resolved by the AGM. According to the resolution of the 2018 AGM, the Chairman received of SEK 410,000 and other Directors received SEK 175,000. For committee work in 2018 the members of the Compensation Committee were paid SEK 16,000 and the Chairman was paid SEK 27,000, while the members of the Audit Committee were each paid SEK 55,000 and the Chairman was paid SEK 80,000.

According to the remuneration guidelines for senior executives approved by the 2018 AGM, the remuneration for the CEO and other members of management can consist of a base salary, variable compensation, long-term incentive schemes and other benefits, including a pension. Any variable compensation is based on performance relative to predefined, measurable metrics and is maximized relative to the target salary.

The fixed and variable salary components and benefits for the CEO and the management of Björn Borg are indicated in Note 8 of the annual report.

INCENTIVE SCHEME
The 2015 AGM adopted a long-term incentive scheme (2015/2019) comprising the issuance and transfer of convertibles and warrants, which was implemented in early summer 2015. The incentive scheme comprises a convertible plan for all employees of Swedish Group companies, including Group Management, and a warrant plan exclusively for Group Management.

As part of the convertible plan, Björn Borg raised a convertible debenture loan with a nominal value of SEK 22,016,800, corresponding to 580,000 convertibles, which can be converted to not more than 580,000 shares in the company. As part of the warrant plan, Björn Borg issued 520,000 warrants that can be exercised to subscribe for not more than 520,000 new shares in the company. Of this total, 480,000 warrants and 478,000 convertibles were transferred. The convertibles and warrants that were not subscribed cannot be subscribed after the 2016 AGM.

At the current subscription level, Björn Borg’s share capital can increase by not more than SEK 285,606, distributed between SEK 123,106 due to the conversion of convertibles and SEK 162,500 due to the exercise of warrants, through the issuance of not more than 958,000 shares. This corresponds to a maximum dilution effect of 4.0 percent of the share capital and votes.

The convertibles were issued at nominal value, which corresponded to the conversion price. The subscription price corresponded to 100 percent of the convertibles’ nominal value. The subscription price of the warrants was the market value according to the Black & Scholes valuation model. Each convertible and warrant in the incentive scheme entitles its holder to convert to, or subscribe for, one new share in Björn Borg at a conversion or subscription price of SEK 37.96, corresponding to 120 percent of the average volume-weighted price paid for the Björn Borg share on Nasdaq Stockholm during the period May 21-29, 2015. Subscriptions and conversions as part of the plans are permitted during the period June 1-14, 2019.

FINANCIAL REPORTING
The quality of the financial reporting is assured through the Board of Directors’ policies and instructions on delegation of responsibility and control as well as the instruction for the CEO on financial reporting, among other things. Prior to each of its meetings, the Board receives the latest financial reports and at each meeting it addresses the financial situation of the Parent Company and the Group. The Board also addresses the interim and annual reports. At least once a year the company’s auditors report on whether the company has ensured that its accounts, their management and financial controls are working satisfactorily. After the formal report management’s representatives leave the meeting, so that the Directors can dialogue with the auditors without the participation of the company’s senior executives.

BOARD REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING
According to the Companies Act and the Code, the Board is responsible for internal control. The following report on internal control over financial reporting for 2018 has been prepared in accordance with these regulations and constitutes part of the corporate governance report. Björn Borg’s Board has evaluated the need for a separate audit function (internal audit) and come to the conclusion that such a function is not motivated at present in view of the staffing in the company’s finance department in relation to the nature, scope and complexity of the business.

ORGANIZATION OF INTERNAL CONTROL OVER FINANCIAL REPORTING
Control environment and corporate governance
The control environment serves as the basis for internal control over financial reporting. The Board of Directors’ rules of procedure and instructions for the CEO and the Board’s committees clearly define the delegation of roles and responsibilities in order to effectively manage the company’s risks. The Board’s Audit Committee has as its specific responsibility to monitor and quality assure the financial reporting. The Audit Committee monitors internal control in connection with its meetings prior to quarterly reporting. Management regularly reports to the Board based on established routines, as does the Audit Committee. Management is responsible for ensuring that the routines and systems...
established for internal control are followed to ensure proper management of significant operating risks. This includes routines and guidelines for various senior executives, so that they understand the importance of their roles in maintaining good internal control.

Risk assessment
Management works continuously and actively with risk analysis, risk assessment and risk management to ensure that the risks the company faces are managed appropriately within the frameworks that have been established. The risk assessment takes into consideration, among other things, the company’s administrative routines with respect to operating, financial and legal risks. Balance sheet and income statement items are continuously reviewed as well if there is a risk of material errors. Assessed risks in major balance sheet and income statement items are graded and monitored. The risk analysis has identified a number of critical processes, with the greatest focus on procurement and revenue processes, where the valuation of inventory and accounts receivable is a key element of the balance sheet analysis. The Audit Committee plays an important role in risk assessment, since it reports its observations and priorities to Björn Borg’s Board.

Communication and control activities
Prior to each of its meetings, the Board receives financial reports. The financial situation of the Parent Company and the Group is treated as a separate point at each Board meeting. The Audit Committee plays an important role in the monitoring process, since it reports its observations and priorities to the Board. Manuals, guidelines and policy documents important to financial reporting are updated and provided to all parties concerned at internal meetings or by e-mail. To ensure that external information is distributed correctly, Björn Borg has a communication policy laid down by the Board. Information reporting and financial reporting for all Swedish subsidiaries are managed by Björn Borg’s finance department. Foreign subsidiaries are managed locally. The company’s auditors conduct the audit of the Group’s financial reporting and review the processes, systems, routines and accounting work conducted by Björn Borg’s finance department.

Monitoring
The Board of Directors of Björn Borg is ultimately responsible for internal control. The Audit Committee appointed by the Board is responsible for, among other things, quality assuring the company’s financial reporting, keeping updated on the focus of the audit and reviewing the effectiveness of the internal control systems for financial reporting.
