Risk assessment

The risk assessment takes into account, for example, the company's administrative routines regarding operational, financial and legal risks. Balance sheet and income statement items where the risk of significant errors could arise are also reviewed continuously. Assessment of risks in various major balance sheet and income items is graded and followed up. The risk analysis has identified a number of critical processes, the greatest focus being on the purchasing and revenue processes, where valuation of inventories and accounts receivable has a high focus in the analysis of the balance sheet. The Audit Committee plays an important role in the risk assessment as it reports its observations and focus areas to Björn Borg's Board

Communication and control activities

The Board receives financial reports before each Board meeting. The Parent Company and the Group's financial situation are treated as a separate item at each Board meeting. The Audit Committee plays an important role in the follow-up process as it reports its observations and focus areas to the Board. Manuals, guidelines and policy documents that are important for financial reporting are updated and informed on an ongoing basis to all interested parties via internal meetings or e-mails. To ensure that the external information provision is correct, Björn Borg has a communication policy established by the Board. The information reporting and financial reporting for all Swedish subsidiaries is handled by Björn Borg's finance department. The foreign subsidiaries are managed locally.
